

Dear _____:

I urge you to oppose A2270/S382, the Death with Dignity Act. These bills have the potential for serious abuses. For example, the bills do not allow for human error, which so often occurs. In the predictions of patients' lifespans, a 6-month prognosis for a terminal illness can be wildly inaccurate. A2270/S382 do not require a patient to consult a psychiatrist, palliative care or hospice expert before receiving and administering the prescription to commit suicide. When pain, depression (from which many terminally ill patients suffer), and other problems are addressed, patients generally stop talking of suicide.

I am also concerned that under A-3328/S-2259:

- No physician is required to be present when the patient takes the lethal prescription.
- There is no requirement to notify family members.

We should be supporting compassionate care, especially improved hospice and palliative care. We should not be assisting people to commit suicide.

Thank you for your consideration for this very important matter.

Sincerely, _____
